IDEEROTH AG · PRODUCT DEVELOPMENT FROM SWITZERLAND

Develop more from less.

Customer presentation · Romanshorn, 15 October 2026

20+	YEARS OF EXPERIENCE	100+	PROJECTS	5	SERVICES

Swiss engineered.

Development, design, simulation and prototyping in house. From the first idea to series production.

What we do

From the first idea to series production: engineering, simulation, development and prototyping under one roof.

Our team supports customers in product development and so improves their competitiveness. We value:

- An independent and neutral perspective
- Targeted implementation and results
- A strong technological and business network
- Industry-specific application expertise

What we do

From the first idea to series production: engineering, simulation, development and prototyping under one roof.

Our team supports customers in product development and so improves their competitiveness. We value:

- An independent and neutral perspective
- Targeted implementation and results
- A strong technological and business network
- Industry-specific application expertise

03 // EXPERTISE

Design with 3D CAD

We design assemblies, fixtures and devices so that they can be manufactured economically.

Every decision is checked in the model before it costs money: tolerances, assembly, choice of material and suitability for series production.

The result: fewer parts, shorter paths and products that last.

From the first idea. To series production.

VIEW FROM THE OFFICE ONTO THE TERRACE

03 // EXPERTISE

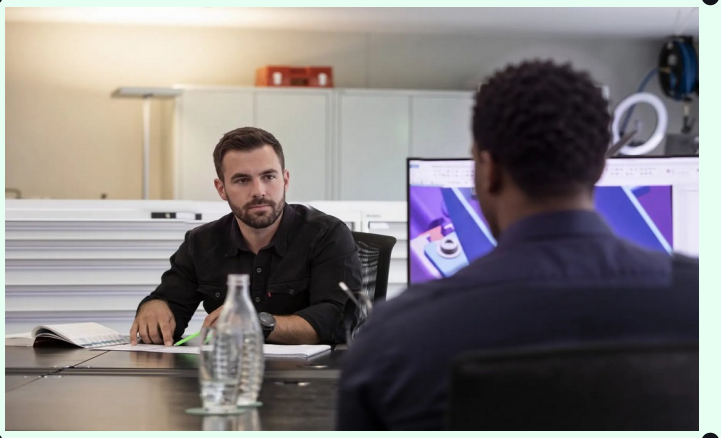

Expertise under one roof

01 // IDEATION

Ideation

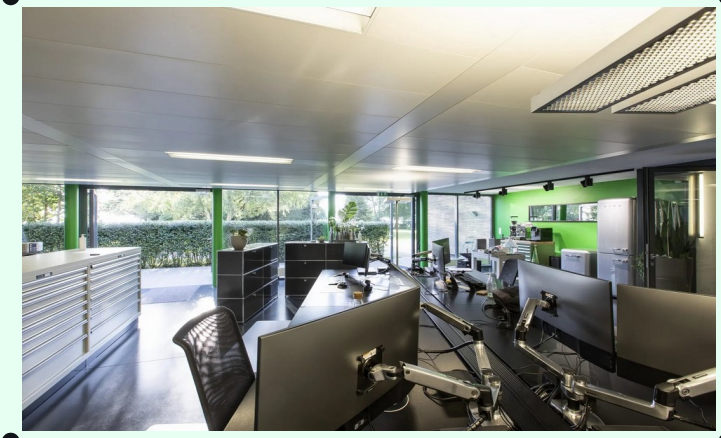

Sharpen ideas, assess variants, find the simplest solution.

02 // DEVELOPMENT

Development

Design with 3D CAD, ready for manufacturing and series production.

03 // SIMULATION

Simulation

Calculate strength and flow before the first part is made.

How we work

01 Idea

02 Concept

03 Design

04 Development

05 Prototype

01 // IDEA · THREE COLLEAGUES CHECK PARTS

05 // TEAM

What we stand for

01 // VISION

Better products for life.

Guided by this vision, we solve problems with our ideas. In our customers' innovation networks we are a long-term partner - sustainable, ecological and efficient.

02 // MISSION

Develop more from less.

Our team supports customers in product development and so improves their competitiveness.

03 // VALUES

Responsible, honest, loyal.

Our people are our most important asset. We offer attractive workplaces and develop our people systematically.

“Develop more from less - the simplest solution is usually the best.”

Alain Roth · Founder, IdeeRoth AG

04 // SERVICES

A project in figures

38%

FEWER PARTS

Assembly rethought, assembly time halved.

6

WEEKS TO PROTOTYPE

From kick-off to the first functional sample.

Work packages and status

NO	WORK PACKAGE	RESPONSIBLE	DUE	EFFORT	STATUS
01	Requirements and specification	A. Roth	31 Mar 2026	8 days	DONE
02	Concept variants A and B	Design team	30 Jun 2026	22 days	DONE
03	Simulation of strength and flow	Simulation team	30 Nov 2026	12 days	ACTIVE
04	Prototype and functional test	Workshop	28 Feb 2027	18 days	OPEN
05	Series preparation and documentation	A. Roth	30 Apr 2027	10 days	OPEN
	Total			70 days	

Fewer parts, less risk

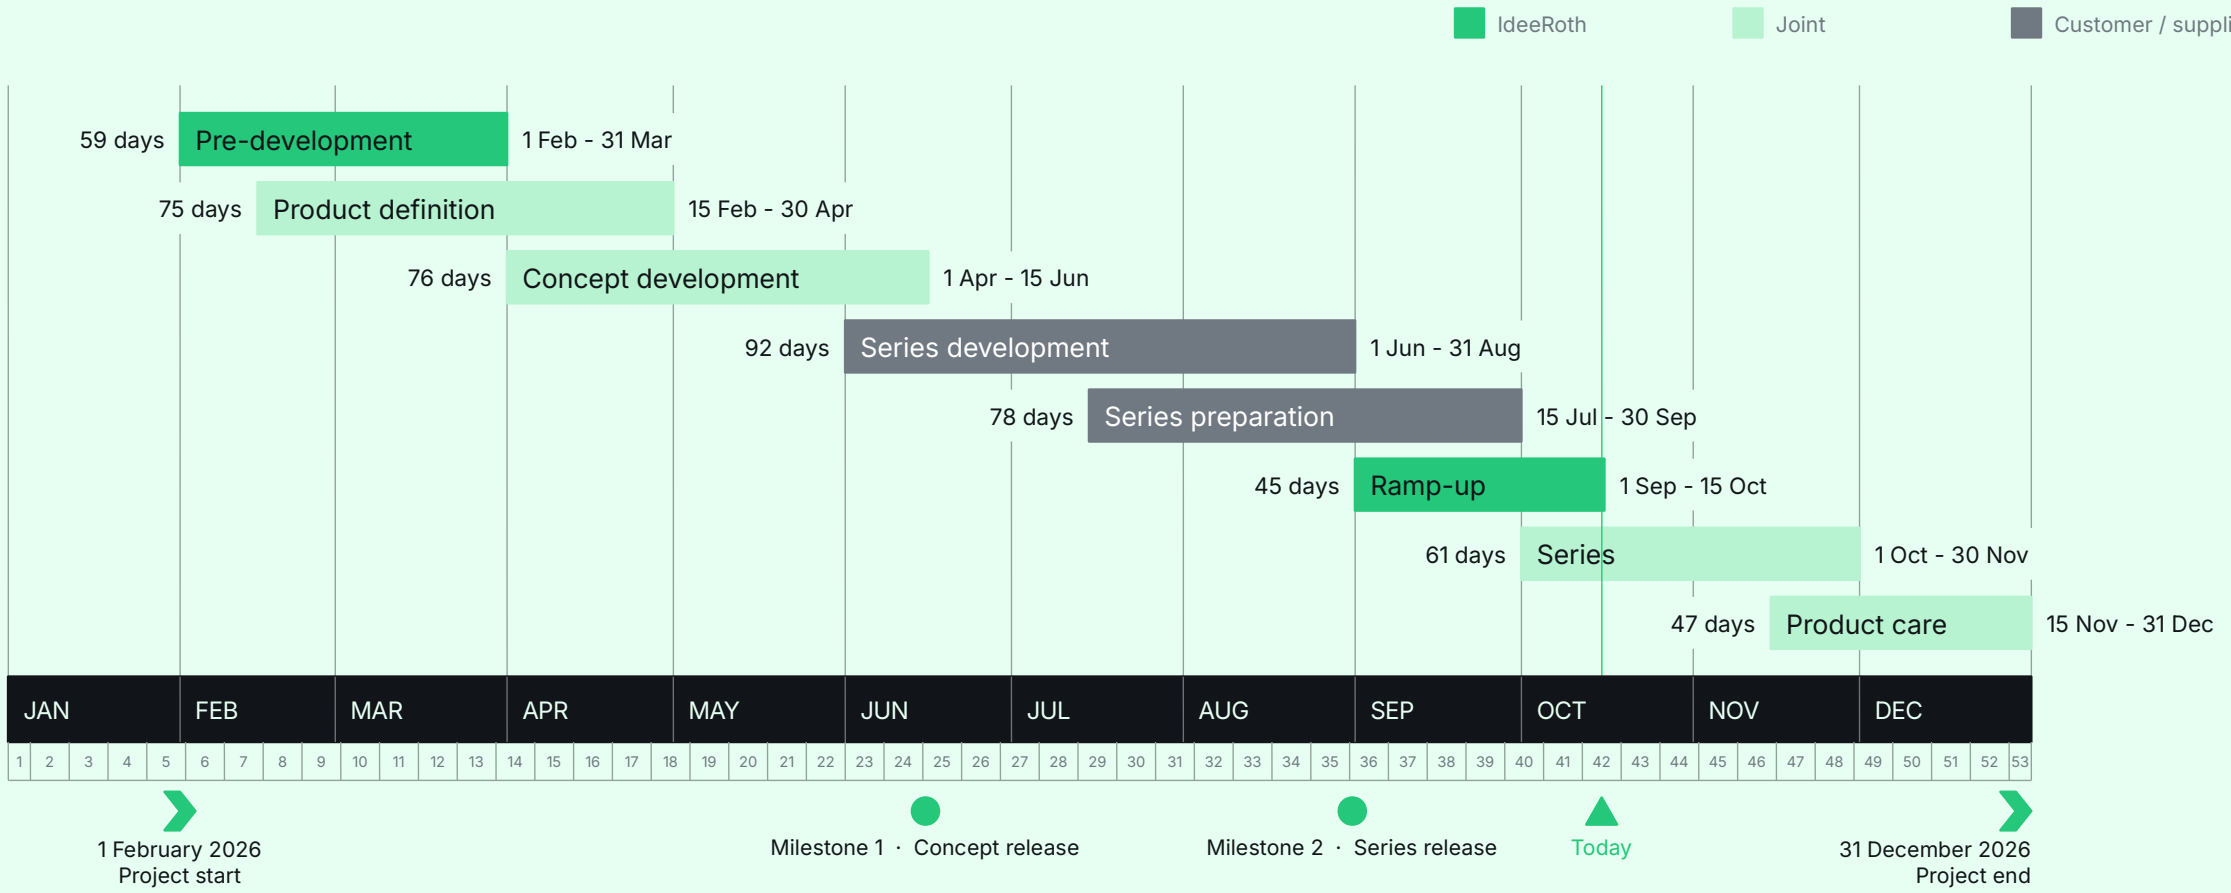

Count per assembly, as-is variant versus new variant

38% fewer parts

The new assembly combines several sheet-metal parts into injection-moulded parts. This cuts assembly steps almost in half and suppliers from nine to five.

Next step: verify tooling costs with two suppliers.

Product creation 2026

What we do

Was wir tun

From the first idea to series production: engineering, simulation, development and prototyping under one roof.
Von der ersten Idee bis zur fertigen Serienentwicklung: Konstruktion, Simulation, Entwicklung und Prototyping unter einem Dach.

- An independent and neutral perspective
  Eine unabhängige und neutrale Sichtweise
- Targeted implementation and results
  Eine zielgerichtete Umsetzung und Resultaterreichung
- A strong technological and business network
  Einen starken technologischen und betriebswirtschaftlichen Leistungsverbund
- Industry-specific application expertise
  Branchenspezifisches Anwendungsfachwissen

DEUTSCH

Von der ersten Idee bis zur fertigen Serienentwicklung: Konstruktion, Simulation, Entwicklung und Prototyping unter einem Dach.

- Eine unabhängige und neutrale Sichtweise
- Eine zielgerichtete Umsetzung und Resultaterreichung
- Einen starken technologischen und betriebswirtschaftlichen Leistungsverbund
- Branchenspezifisches Anwendungsfachwissen

02 // CONCEPT VARIANTS

Sheet metal or injection moulding

VARIANT A · SHEET METAL

- 48 parts, 9 suppliers
- Low tooling cost, high part cost
- 31 assembly steps

48 parts · CHF 48 · tooling CHF 9,000

VARIANT B · INJECTION MOULDING

- 30 parts, 5 suppliers
- High tooling cost, low part cost
- 17 assembly steps

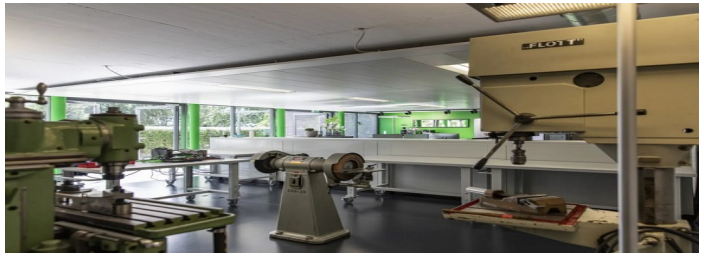

30 parts · CHF 31 · tooling CHF 42,000

TEMPLATE · GRAPHIC ELEMENTS

Building blocks for your own slides

01 // TEXT FIELDS

Text field with a thin frame for notes, assumptions or quotations from documents.

Highlight on Fresh Mint for the most important point of a slide, one per slide.

Key message on Carbon Black, text in Ice Mint, number or keyword in Signal Green.

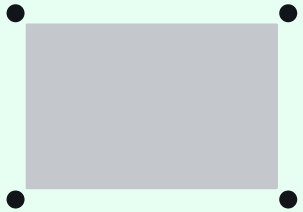

02 // LINES, ARROWS, MARKERS

Arrow, sequence

Arrow, emphasis

Arrow, option

Line, divider

Round corner markers around photos, sketches and screenshots

- Dot instead of square as bullet
- Same dot in every list

03 // STATUS AND RELEASE (TRAFFIC LIGHT)

DONE | ACTIVE | OPEN

Task status: done, active, open (brand colours)

CONFIDENTIAL | UNDER REVIEW | RELEASED

Release status as traffic light: red = attention, prohibition, confidential; amber = under review, preliminary; green = released. Labels only, never content.

INTERNAL | DRAFT

Neutral labels without traffic-light meaning

TEMPLATE · COLOURS

Colour concept: brand, ground, status

Carbon Black
DARK GROUND · TEXT ON LIGHT

HEX #111418
RGB 17 · 20 · 24
CMYK 29 · 17 · 0 · 91
HSL 214° · 17 % · 8 %

Ice Mint
MINT GROUND · TEXT ON DARK

HEX #E7FFF2
RGB 231 · 255 · 242
CMYK 9 · 0 · 5 · 0
HSL 148° · 100 % · 95 %

Signal Green
ONE ACCENT PER SLIDE

HEX #25C77A
RGB 37 · 199 · 122
CMYK 81 · 0 · 39 · 22
HSL 151° · 69 % · 46 %

Fresh Mint
SECOND HIGHLIGHT · LINKS

HEX #B7F3D0
RGB 183 · 243 · 208
CMYK 25 · 0 · 14 · 5
HSL 145° · 71 % · 84 %

Steel Gray
SECONDARY TEXT · LABELS · INACTIVE

HEX #707981
RGB 112 · 121 · 129
CMYK 13 · 6 · 0 · 49
HSL 208° · 7 % · 47 %

Light Gray
PLACEHOLDERS · AS-IS VALUES

HEX #C4C8CC
RGB 196 · 200 · 204
CMYK 4 · 2 · 0 · 20
HSL 210° · 7 % · 78 %

GROUND COLOURS

White
Documents, print, dense content

Mint
Presentation on screen

Dark
Title, chapter, quote, closing

STATUS COLOURS (LABELS ONLY)

Red
Attention, prohibition, confidential
#B8463A · 184 · 70 · 58

Amber
Under review, preliminary
#E2A33D · 226 · 163 · 61

Green
Released (Fresh Mint)
#B7F3D0 · 183 · 243 · 208

Which colour when

Ground
One ground colour per slide. White for documents to read and print, Mint for presentations on screen, Dark for title, chapter, quote and closing. Do not switch between White and Mint within one presentation.

Signal Green
Accent only: active state, one key figure, today line, buttons, links, label "Recommended", series "New" in charts, IdeeRoth bars in the schedule. Never for body text, never as a surface behind text.

Lines
Text colour at 40% opacity: #A0A1A3 on White, #91A19B on Mint, #707274 (white) on Dark. 0.5 pt solid, like the line in the hero of the website.

Print
CMYK is the standard conversion without a colour profile. Signal Green lies outside the print gamut and will look duller; agree print values with the printer once.

Proportions
Ground colour about 70%, text and grey 25%, Signal Green at most 5%.

Fresh Mint
Surface behind a highlight, links and hover on Dark, light schedule bars, label "Released".

Traffic light
Red, amber and green only for release labels: red = attention, prohibition, confidential; amber = under review, preliminary; green = released. Never for charts or text, otherwise the traffic light loses its meaning.

PowerPoint
Brand and status colours are available as theme colours in the colour picker; tints are generated automatically.
